

LITTLE ROCK ZOO  
September 16, 2015

# CITY OF LITTLE ROCK

## September 16, 2015

- **The AR Heritage Farm construction is nearing completion and the Grand Opening is scheduled for Spring 2016. (This allows time for the animals to acclimate to their new environment.)**
- **We are preparing the bid this fall for the AR Heritage Farm Graphics Project.**
- **Reticulated Python exhibit scheduled to open this fall.**
- **Based upon recommendations from the Zoo Board of Governors, it was determined there is a need to build a new otter exhibit instead of investing money into the renovation of an exhibit that is more than 50 years old and has a declining infrastructure.**
- **Construction for the Gray Water Treatment Plant is beginning this fall.**
- **The purchase of a digital radiography X-ray machine to improve the quality of animal care is pending approval from the Board of Directors.**
- **Signage denoting the completion of LRCent Projects are now visible throughout the Zoo. (See attached sample)**
