

# LITTLE ROCK SUSTAINABILITY OFFICE COMMUNITY RESOURCES

DEPARTMENT OF  
PUBLIC WORKS

SUSTAINABILITY  
OFFICE

HELLO!

I'm Ray, the Recycling & Sustainability Educator for the City of Little Rock. I was born and raised in Little Rock, and I'm an LRSD graduate.

One of my main goals in this position is to get students thinking sustainably at school. I'm fully bilingual in English and Spanish and am happy to engage all learners.

**I can connect your students to a variety of learning opportunities, on Earth Day or any day!**

- What is sustainability, and why is it important?
- Trash and recycling - where does it go? Why does it matter?
- Pollution + prevention (air, water, land, litter)
- Food waste & composting
- Hazardous waste
- Waste reduction strategies
- Field trips to the recycling center
- Educational videos and materials
- Reading + hands-on activities
- Organizing a 'Green Team' at your school

I want to make this as easy and convenient as possible. *I hope to be a resource for students, residents, and community organizations.*

If you are interested in how these topics add depth and real-world examples to student learning objectives, please reach out.
